## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 24 October 2002 have been fully considered but they are not persuasive.
2. In response to applicant's arguments, the recitation "a receptacle for holding fine powder medicament" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Furthermore, Melton, Jr. teaches wherein the receptacle seals a measured quantity of particulate material (col. 6, lines 64-66). Melton, Jr. is fully capable of holding fine powder medicament.

### ***Drawings***

3. The proposed drawing correction filed on 10-24-2002 has been disapproved because it is not in the form of a pen-and-ink sketch showing changes in red ink or with the changes otherwise highlighted. See MPEP § 608.02(v).

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Melton, Jr. et al. 3,967,761.

6. As to claim 1, Melton, Jr. et al. teaches a receptacle for holding fine powder medicament, the receptacle comprising: a receptacle body that defines an enclosed cavity, wherein the receptacle body has a top end, and wherein the bottom end of the receptacle body includes a raised central region that extends upwardly into the cavity (fig. 11 and 12).

7. As to claim 2, Melton, Jr. et al. teaches a receptacle as in claim 1, wherein the receptacle body further comprises at least one curved wall that in combination with the raised central region forms a generally semi-toroidal geometry in the cavity (fig. 11 and 12).

8. As to claim 3, Melton, Jr. et al. teaches a receptacle as in claim 1, wherein a portion of the bottom end is flat in geometry (fig. 15 and 16).

9. As to claim 4, Melton, Jr. et al. teaches a receptacle as in claim 1, wherein the receptacle body further includes a tab extending from the cavity (fig. 6 and 11).

### ***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3761

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
